Donald Rumsfeld: Wheaton Women Threat to National Security

Our reporters were mistaken for terrorists and are still missing at this point. However, we were able to distill some shocking information from what they e-mailed us five minutes before their capture. It seems Wheaton women are so good at saying no that they pose a threat to national security. What would happen if, instead of saying no to ugly guys, they were saying no to U.S. hegemony or global free trade? Donald Rumsfeld is strongly encouraging all Wheaton women to work for the NSA where they will teach the whole world how to say no to drugs and terrorism. If any of them choose to decline this offer, they must respond to all yes or no questions with, "I can neither confirm nor deny that request. Goodbye".

Wheaton Student Takes Advice, "you are a human being, not a human doing" to Heart, Fails All Exams

An anonymous freshman decided that being in front of the Nintendo was better than doing all that nasty studying required of him. After failing all of his exams, he asked an unnamed prof what he did wrong. The prof dispensed wisdom rapidly, "There is a fundamental difference between man and dog. When a man is doing and a dog is being, everything is all right. But when a man is being and a dog is doing, watch out!"

13-state Manhunt Ends Successfully After Bookstore Robbery

An extensive manhunt involving federal and state law enforcement agencies has ended in success. They closed the book on the Wheaton College Bookstore robbery case finding the bookstore guilty of 153,263 counts of theft. It seems that \$150 for a textbook or \$45 for a printer cartridge really is too much.
